PLANNED GDR IMPORTS OF HEAVY PLATE AND PLANNED PRODUCTION OF HEAVY AND MEDIUM PLATE FOR THE
STAHL- UND WALZWERK HETTSTEDT (3 pp; German; date of document: [REDACTED] date of information: [REDACTED]
[REDACTED] distribution date: 8 Oct 52)

Comment: The construction of several seagoing ships of sizes up to 8,000 GRT is scheduled under the Five-Year Plan for East Germany. At present, East Germany is forced to import plates for shipbuilding from the West, because the East German rolling-mill capacity for such plates will not be adequate until about the end of the Five-Year Plan, and because there is also a shortage of these plates in the Satellite countries.

The 3-page photostated document contains the following:

1. Planned imports through DIA Metall (Intra-German and Foreign Trade Agency for Metals) of heavy plate during the second quarter 1952 (unit of quantity not given, probably tons):

Supplier	Commodity	Quantity to be Used by
